Pro2 Archive Services

Optimize Your QAD Database—While Maintaining Data Access

DATA SHEET

With the explosive growth of data, along with increasing user demands for more access to that data for reporting, analytics and business intelligence, it has never been more challenging to maintain optimal performance for your QAD applications.

This is where Progress Pro2 Archive Services comes in. It's a two-step approach that blends the best of Progress Services Archive Delete Utility (ADU) and Progress Pro2 data replication. The result is a solution that enables you to continually archive, but never lose the data, then replicate the data to an MSSQL and Oracle repositories and run all your reporting from these data sources.

Progress Services Archive Delete Utility

Progress Services Archive/Delete Utility (ADU) makes the task of archiving and deleting data from a QAD system simple and easy with a user-friendly interface that allows complete control over scheduling and executing the process. It makes the challenge of deletion, archival or storage of QAD invoices, orders, transaction histories, or customer information fast and easy, helping you keep your QAD system optimized while maintaining complete access to the information.

Pro2 SQL Real-Time Replication

Making businesses decisions on exported data is nothing new—but what good is making those decisions on stale data? That's where Pro2 data replication comes in. Pro2 provides real-time replication with no connectivity limitations and no application changes. The result: no disruption to normal business operations or risk to your systems of record.

Pro2 Archive

With the combination of the Progress Services Archive Delete Utility and Pro2 SQL real-time replication, Pro2 Archive is the ultimate solution for managing the growth of your QAD database without losing any historical reference. Give decision makers the real-time data they need to make the best decisions to grow the business.
